SECTION B1 - COMPETENCY FRAMEWORK

In the below Competency Framework, "core competencies" are competencies that cut across all levels of work in a municipality and enhance contextualised leadership that guarantees service delivery impact; and "leading competencies" means competencies that are required to develop clear institutional strategy, initiate, drive and implement programs to achieve long-term sustainable and measurable service delivery performance results.

This competency framework replaces regulation 26(8) of the Local Government: Municipal Performance Regulations for Municipal Managers and Managers directly accountable to Municipal Managers, 2006.

A person appointed as a senior manager must have the competencies as set out in this framework.

The competency framework consists of six leading competencies which comprise of twenty (20) driving competencies that communicate what is expected for effective performance in local government.

The competency framework further involves six (6) core competencies that act as drivers to ensure that the leading competencies are executed at an optimal level.

There is no hierarchical connotation to the structure and all competencies are essential to the role of a senior manager to influence high performance. All competencies must therefore be considered as measurable and critical in assessing the level of a senior manager's performance.

The competency framework is underscored by four (4) achievement levels that act as benchmark and minimum requirements for other human capital interventions, which are, recruitment and selection, learning and development, succession planning, and promotion.

The competencies that appear in the competency framework are detailed as follows:-

(a) Performance Calculations and Ratings

At the end of each performance review cycle, the employee will be assessed in terms of the required targets reflected on his / her respective performance plan. The following elements are essential in determining performance levels:

(b) Performance Weighting

Weightings allow emphasis to be placed on KPAs and key objectives that carry more importance and/or take more time. Every KPA in the performance agreement or plan must be assigned a weighting. The total of the weightings on each of the two components of the performance plan must add up to 100.

The purpose of the weighting is to enable Council to ensure performance of the key objectives with the highest strategic importance, and to reward outstanding performance accordingly.

(c) Performance Rating

The rating can be defined as the level of achievement of the targets set for a specific key performance area. The Nelson Mandela Bay Municipality uses the five-point system for rating performance, as contained in the performance agreement (see Clause 7.6).

(d) Score

The score represents the product of the average rates of all the targets for each key performance indicator, and the weight for the respective key performance area; e.g. if the average rate is 3 and the weighting is 15, then the weighted score = 3 X 15, which equals 45.

(e) Total Weighted Score and Performance Percentage

The total score is the sum of the weighted scores for all the key performance areas and competency requirements for a specific position. Therefore by adding all the weighted scores, one arrives at a figure representing the total weighted score.
